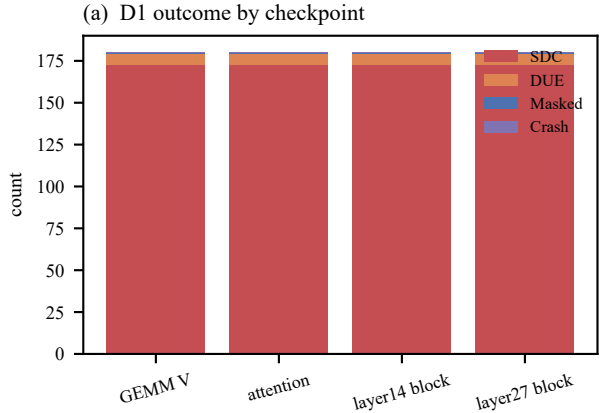
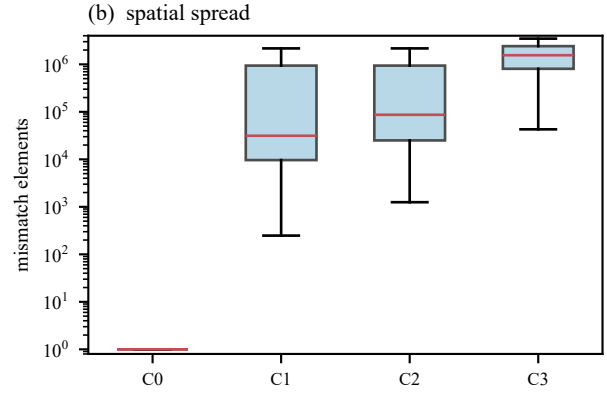
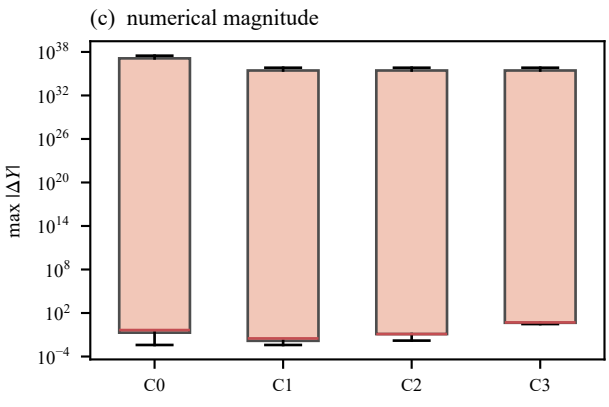
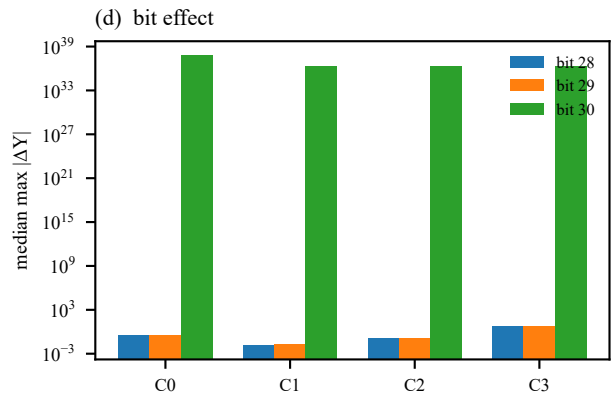
Layer-14 qkv_v HMMA fault propagation through layer 27

180 random layer-14 qkv_v HMMA sites; bits 28–30; C0 V → C1 attention → C2 layer14 → C3 layer27









D1: NaN/Inf detector. Clean 30/30; sham 27/27. No layer0/27 injection; no bit24–27.
